If you create or work with Translated 3D CAD Data and need accurate, high quality solid models and surfaces, please read on ...

Designers and Engineers around the world exchange CAD data daily by providing IGES, STEP, ACIS, or Parasolid "neutral" CAD files from their "native" CAD solutions like CATIA, UG-NX, Pro/E, Solidworks, SolidEdge, AutoCAD, Inventor and many others. Many times when this data is exchanged with others the quality of the data is less than the original "native" CAD file and this can cause many problems for anyone using these inferior quality CAD models. All native CAD solutions incorporate different 3D model tolerance schemes, causing issues like gaps, incorrect trimming and other problems when exchanging CAD models.

Capvidia provides technology and services to **translate/convert, repair, heal and validate** 3D CAD models from one format to another in **native and neutral formats, without having any additional CAD licenses.**

Capvidia invites you to attend the new 3DTransVidia and FormatWorks CAD Exchange Event For Automotive OEM's and their Tier 1/2/3 Suppliers

Automotive OEM's and Suppliers who attend this event will learn how to:

- Correct, heal and repair translated and native CAD models to suit you and your supplier needs
- Provide your suppliers with quality 3D CAD data in whatever format they need
- Maintain product intent by **validating** the translated CAD model vs. the original native 3D CAD model
- Reduce costs by eliminating "manual" time dedicated to repair and correct translated CAD models
- Improve communications with your customer and supplier by supplying them accurate, reliable data
- Pursue new markets with a Translation tool that does not require additional CAD licenses
- How to create a single skin surface and offsets from the original CAD data correctly automatically

What is Capvidia 3DTransVidia and FormatWorks?

- Providing your company with.....
- The correct set of Software tools to assist you to evaluate, repair and heal issues related to translation
- The ability to work with CATIA V4/V5, NX, Pro/E, Inventor, Solidworks, data without their CAD licenses
- Batch tools for translation and validation
- Easy to use visualization tools to pinpoint and document problem areas to communicate issues
- Quality tools to support AIAG D-15, JAMA, VDA 4955
- Local installation or lower cost Web based solution

Who Should Attend ?

- Those responsible for exchanging 3D CAD Data
- Die/Mold/Fixtures/Tooling Design, Product Design
- Supplier CAD Data Mgmt, V4 to V5 migration
- IT Mgrs, Mfg. Engineers, Engineers, Designers
- Those concerned about translated CAD Quality

When/Where is it ?

- **Thursday May 15, 2008 see Faxback for details**
- MSU Mgmt Education Center in Troy, Michigan
- FormatWorks AM session and 3DTV PM Session

To register for this complimentary event, please return the enclosed Fax/Email-Back Registration Form which includes the agenda, time, date & location for this event.

Please contact me with questions at (734) 474-7864/office, or send email to bruce.stein@capvidia.be or Capvidia@charter.net. I look forward to meeting with you and helping you solve your Translation issues.

Regards,

Bruce Stein, Director of NA Sales
